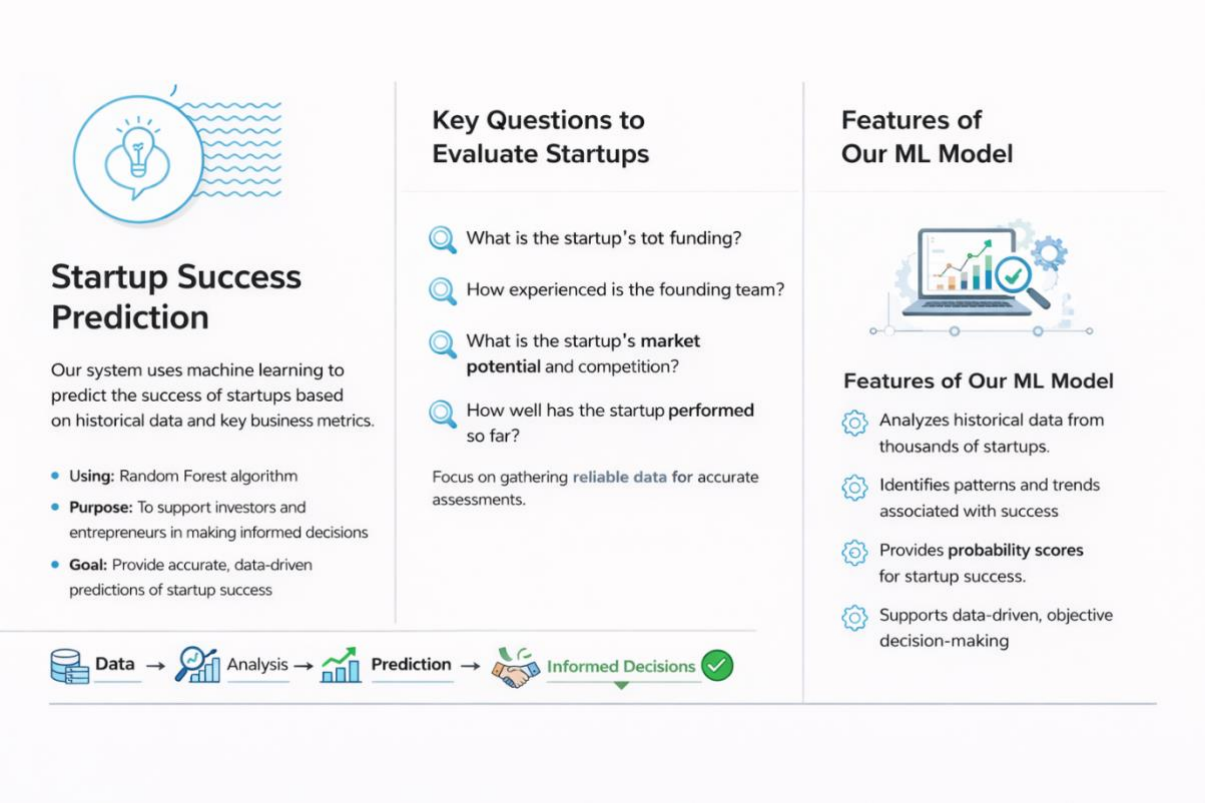
| Project Name | Prosperity Prognosticator: Machine Learning for Startup Success Prediction |
| Maximum Marks | 4 Marks |

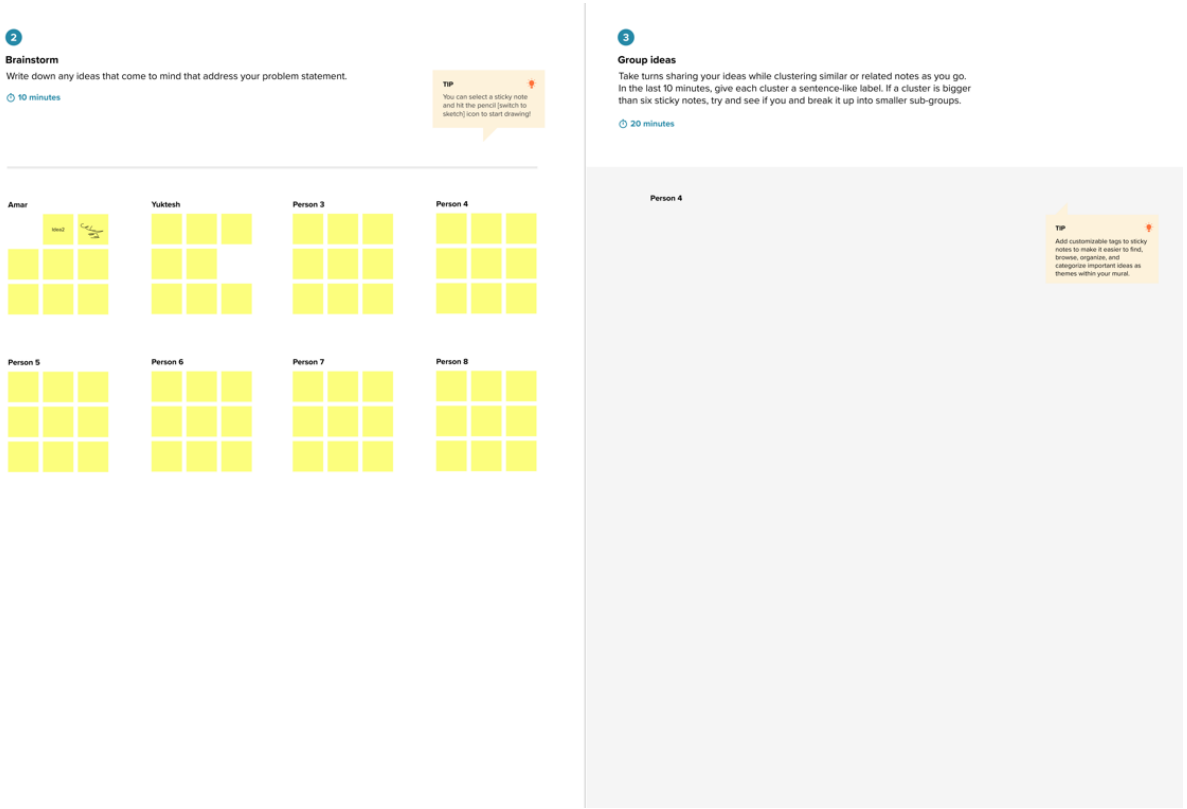
**Brainstorm & Idea Prioritization Template:**

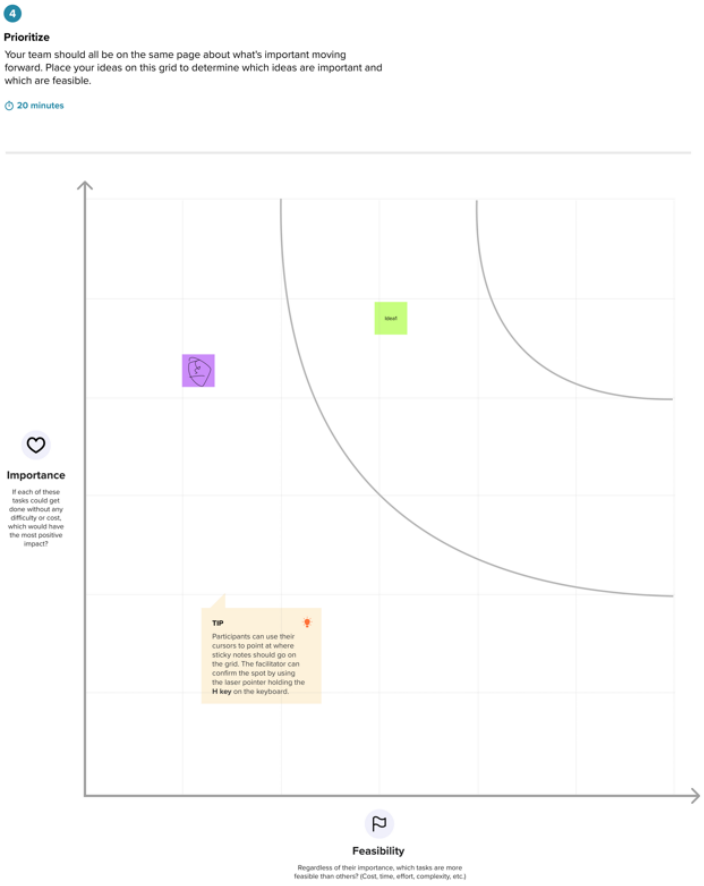
Brainstorming was conducted within the team to identify possible approaches for solving the problem of startup success prediction. During this session, different technical solutions and implementation strategies were discussed. The objective of this brainstorming activity was to evaluate feasible machine learning models and determine the most suitable approach for developing a predictive system.

**Step-1: Team Gathering, Collaboration and Select the Problem Statement**



## Step-2: Brainstorm, Idea Listing and Grouping





## Step-3: Idea Prioritization
