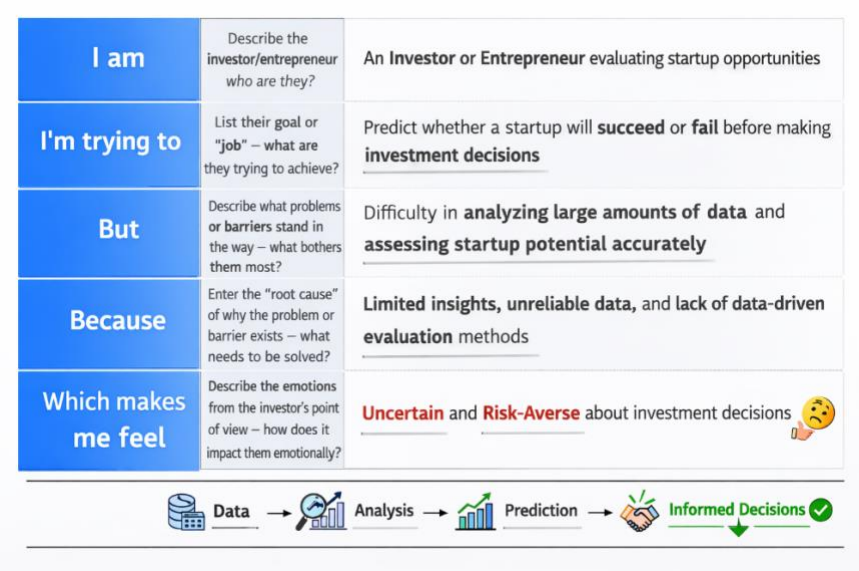
Ideation Phase
Define the Problem Statements

Date	23 January 2026
Team ID	LTVIP2026TMIDS90862
Project Name	Prosperity Prognosticator: Machine Learning for Startup Success Prediction
Maximum Marks	2 Marks

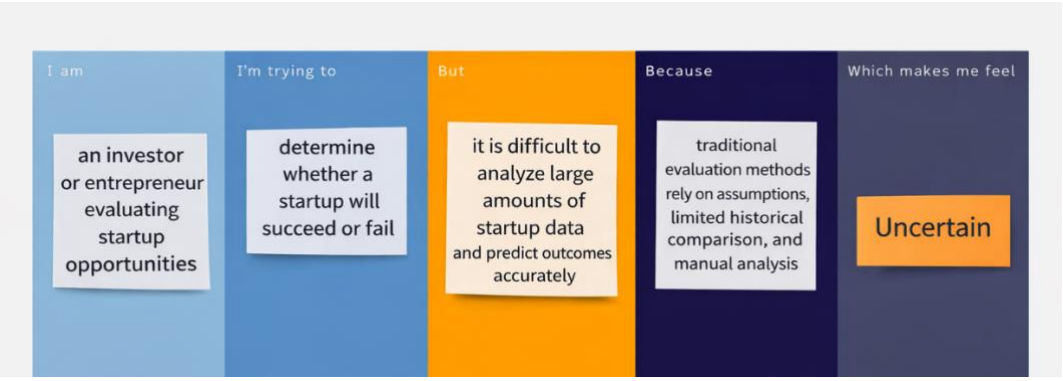
Customer Problem Statement Template:

This section defines the core problem faced by users of the system. Investors, entrepreneurs, and policymakers often struggle to determine whether a startup will succeed or fail based on available business and financial data. Decision-making is usually based on assumptions, limited experience, or incomplete analysis.

The challenge is to develop a system that can analyze historical startup data and provide a data-driven prediction of startup success. By understanding this problem, the project aims to build a machine learning model that supports informed and objective decision-making.



Example:



Problem Statement (PS)	I am (Investor)	I'm trying to	But	Because	Which makes me feel
PS-1					
PS-2
