Ideation Phase
Empathize & Discover

Date	26 January 2026
Team ID	LTVIP2026TMIDS90862
Project Name	Prosperity Prognosticator: Machine Learning for Startup Success Prediction
Maximum Marks	4 Marks

Empathy Map Canvas:

An empathy map is a simple and easy-to-understand visual tool that captures knowledge about a user's behaviours, needs, and attitudes. It helps teams better understand their users and design solutions from the user's perspective.
In this project, the empathy map is used to understand the needs of investors, entrepreneurs, and policy makers. Investors want to reduce risk and maximize returns. Entrepreneurs want guidance to improve startup success. Policy makers want data-driven insights to support innovation and economic growth. Understanding these perspectives helps in designing an effective machine learning model for startup success prediction.
